

EV27 Desert Cam

“Cool Cam for Hot Climates”

EagleVision Model: **EV27-D Series**

Features:

Reflective sunhood for operation in 70°C environments

MX4 camera with MFP (Mechanical Filter with Photocell) Technology

4-8mm and 10-40mm vari-focal, auto-iris lens options

Ruggedized aluminum housing

All-weather sand/dust proof

Performance:

- MX4 CCD provides accurate color in daytime and high IR sensitivity at night
- Protected from solar heat gain
- Tested for high 70°C ambient temperatures
- Designed for desert glare
- Matched optional IR illuminator
- IP67 Waterproof
- Dust-tight and Sandstorm ready

Benefits:

- Performance in desert conditions
- Outstanding optical performance in bright light and high contrast situations
- Thermally stable design for extreme temperatures
- 250 ft+ of award winning night vision when coupled with UF500 Infrared Illuminators

Applications:

- Desert Locations
- Tropical Locations
- Government Buildings
- Defense Outposts

Below:

Matched with an infrared illuminator, the EV27 Desert Cam provides effective day/night surveillance in desert and tropical conditions like this example capture just before midnight.
